As we begin the 2021 new year, EPC Benefit Resource's would like to give a big welcome to our new plan participants and to let you know we are excited to serve our EPC pastors and staff. One of our goals is to encourage and educate our plan participants regarding their physical, spiritual, and financial well-being. We aspire to provide resources to better manage your health conditions, make preventative care a habit, and to improve your overall health.

CAN YOU RELATE?

- The vast majority of U.S. men do not seek care right away when they are concerned about their health, sick or in pain
- Roughly 20% of women have postponed preventive care, skipped recommended tests or treatments or made medication trade-offs because of cost
- Nearly 1 in 4 women report not obtaining necessary care because they didn't have time and because they couldn't take time off work
- In general, men wait a few days or a weeks to see if they feel better and about 3 in 10 push it as long as possible before reaching out for help

Don't you wish you could instantly have an audience with a primary care physician to address your concern? And at no cost? **YOU CAN!** If you are enrolled in any EPC health benefit you are already enrolled in 98point6 virtual visit primary care. Open the app, click start visit and your appointment begins anytime and as often as you need it 24/7. It's that simple. Click this [link](#) to learn more.
